COMPETENCY AND SAFETY TRAINING

Engineering change

CONFINED SPACES / WORKING AT HEIGHT / SAFETY PASSPORT (CCNSG)

Engenda Group offers a comprehensive range of training courses to internal and external parties in either an eCITB accredited training centre or off site location.

Engenda Group originally set up the training centre to fulfill its strong commitment to improving the competence of its own workforce.

Having an eCITB approved training centre enabled the delivery of bespoke and standard training at the quality, cost and timeframe needed to remain responsive to client needs.

Engenda Group have since opened up the training centre to clients and customers to share experiences and expertise. The training centre offers a comprehensive range of training courses in a fully equipped, modern environment. Training is delivered in a pleasant, yet challenging environment where all learning levels and abilities are catered for. A number of purpose built training rigs allows delivery of all levels of confined space, rope access and working at height training. The multidirection, confined space training rigs combines horizontal and vertical chambers, lifting equipment and bespoke flange integrity training rigs to ensure a realistic learning experience that maximises the ability to transfer classroom learned skills to the workplace.

Courses currently delivered to ECITB accreditation:

- Confined space awareness
- Confined space low risk
- Confined space medium risk
- Confined space high risk
- Working at height
- CCNSG safety passport
- CCNSG safety passport renewal
- CCNSG 1 day leading team safely
- IOSH safety, health and the environment module 4
- ECITB manual handling

Other courses:

- First aid appointed person
- First aid at work
- Confined space search and rescue
